

Registration of Intent – Bidirectional Exchange of Immunization Data

Please provide the following information to notify the Texas Department of State Health Services (DSHS) and Texas Immunization Registry (TIR) of your election to participate in bidirectional data exchange.

Organization Information

Parent/ Headquarters/ Facility Name (as registered in ImmTrac2): _____

Mailing Address (no P.O. boxes): _____

City: _____ State: _____ ZIP Code: _____

Phone No.: _____ TX IIS ID.: _____ Group NPI (if applicable): _____

Will your organization report immunizations for multiple locations/facilities? Choose an item.

Primary Contact Person

When the Registration of Intent is received by the TIR, the person listed below will receive an email with instructions on how to complete the onboarding process for bidirectional exchange of immunization data.

Note: The person listed must be an employee of the facility indicated above.

Full Name: _____ Title: _____

Phone No.: _____ Email Address: _____

Secondary Contact Person

Note: The person listed must be an employee of the facility indicated above.

Full Name: _____ Title: _____

Phone No.: _____ Email Address: _____

Bidirectional Exchange Readiness

Bidirectional exchange of immunization data is the two-way, real-time communication between a facility's Electronic Health Record (EHR) system or vendor and the TIR. Bidirectional data exchange requires a real-time web service, such as Simple Object Access Protocol (SOAP) technology for sending query and response messaging.

1. Is your facility currently exchanging HL7 data with the TIR? No. ☐

2. Are your facility and EHR vendor ready and able to perform bidirectional data exchange? Yes. ☐

3. EHR Vendor: Elation Health ElationEMR
EHR Software: _____

Bidirectional Exchange Methods:

Which method will your facility (through your EHR Vendor) use for bidirectional data exchange?

Query and rep 

1. Query Only - No Reporting of Immunizations

- Query or look up patients in the registry.
- Receive immunization history and recommended vaccines (forecast) for registry clients in real-time from the registry.

This method is more appropriate for organizations who do not immunize, such as schools, day care facilities or managed care organizations (health plans).

2. Query and Reporting

- Query or look up patients in the registry.
- Receive immunization history and recommended vaccines (forecast) for registry clients in real-time from the registry.
- Add and/or update registry client's demographics or immunization record.

This method is more appropriate for organizations who do immunize.

Electronic Signature

By entering your name below, you are signing this form electronically. You agree your electronic signature is the legal equivalent of your manual signature on this form.

- I hereby certify that all the above information is true and accurate to the best of my knowledge.
- I hereby certify that my organization and EHR vendor will actively query or report immunization data via bidirectional means and address all data quality issues that arise from the exchange of immunization data.
- Completing this registration of intent indicates to DSHS that your organization is ready to begin bidirectional real-time data exchange with the registry.

Please note that the registration of intent for bidirectional data exchange of immunization with the registry is separate from your registration/attestation requirements done with the Centers for Medicare and Medicaid Services or Texas Medicaid for Promoting Interoperability (*formerly known as the Medicare and Medicaid EHR Incentive Programs*).
